EXPERIENCE

Samsung Research Institute

Software Engineer

July 2024 – Present

Noida/Bangalore, India

VXT Remote Management System

- Redesigned legacy socket streaming into a state-reconstruction Remote Control service using **DASH** protocol for VOD, resolving real-time UI lag across **100,000+ displays** and cutting infrastructure costs by **80%**.
- Engineered a CDN-backed Web UI synchronization pipeline using **500ms telemetry payloads**, reducing network bandwidth consumption by **95%** globally.
- Secured device communication pipelines using **mTLS** with Tizen Knox hardware trust, short-lived scoped **JWTs**, and sliding-window nonces to prevent replay attacks.

Tech Stack: C++, Tizen OS, WebSockets, Java, Spring Boot, Redis, PostgreSQL, mTLS, JWT, AWS CloudFront

Self-Healing Agentic AI Unit Test Automation

- Built an autonomous testing system that parses codebases and generates unit tests automatically, reducing test creation time by **70%** and saving **100+ developer-hours/month**.
- Designed backend orchestration services for autonomous debugging workflows, enabling scalable execution across enterprise codebases for the platform's **B2B offering**.
- Optimized context retrieval and prompt construction across agentic workflows, lowering **LLM token consumption by 45%**.
- Enabled deployment across enterprise client codebases, contributing to a **23% increase in platform sales**.

Tech Stack: Python, LLMs, Agentic AI, AST Parsing, Git, RabbitMQ, RAG

VXT CMS Mobile [Play Store]

- Built and deployed a cross-platform enterprise app for display configuration, RBAC, live telemetry, and push alerts; achieved **10,000+ downloads** with a **4.5+ rating**.

Tech Stack: React Native, JavaScript, AWS Lambda

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript, SQL

Backend & Distributed Systems: Spring Boot, gRPC, WebSockets, RabbitMQ, Apache Kafka, REST APIs

Databases & Cloud: PostgreSQL, Redis, MongoDB, AWS Lambda, Amazon S3, AWS CloudFront

Systems & Security: Multithreading, Concurrency, IPC, WinAPI, Protocol Buffers, mTLS, JWT

AI & LLM: Agentic AI, RAG, LLM Integration, Prompt Engineering, AST Parsing, MCP Servers

ACHIEVEMENTS

- Competitive Programming:** CodeChef 5★, Codeforces Expert, LeetCode Guardian (**Top 2% globally**).
- Google Code Jam:** Achieved Global Rank **447**.
- Chess:** Remote coach with students across **20+ countries**; Chess.com **2100+** (99.9th percentile) & FIDE **1600+**.

EDUCATION

Delhi Technological University (formerly DCE)

Bachelor of Technology in Information Technology (IT) – **CGPA: 8.49/10.00**

Dec 2020 – Apr 2024

Delhi, India
